Collegiate Cyber Defense Competitions

Inject Name	Implement SNMP
Inject ID	SA103

Description

Implement SNMPv2c on each server and network device. Make provisions to security policies so that SNMP read-only access is available to the external network, so that a network monitoring provider can reach each device with SNMP.

Deliverable

Provide a business memo that enumerates the following information for each device:

- External IP Address
- Public Community string for Read-Only access
- Host name of the device
