INTEROFFICE MEMORANDUM

To: IT Support

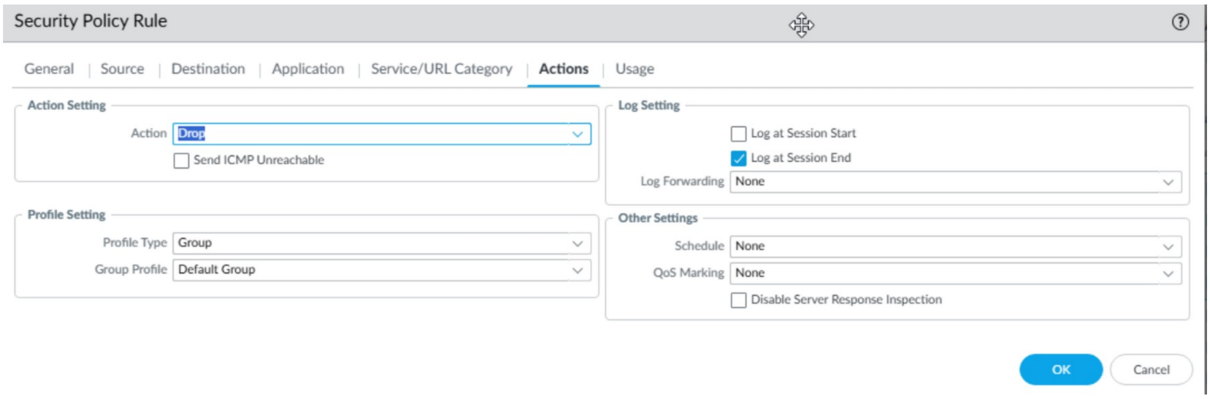
From: Team 02

Date: October 24, 2026

Subject: Logging Denied FW Packets

Summary: We are actively working on logging dropped packets on our firewall.

Firewall logging is configured in each individual Security Policy Rule. This is edited by selecting the Security Policy Rule > Actions > Log at Session End.



Action: Drop

☐ Send ICMP Unreachable

Profile Type: Group

Group Profile: Default Group

☐ Log at Session Start

☑ Log at Session End

Log Forwarding: None

Schedule: None

QoS Marking: None

☐ Disable Server Response Inspection

Figure 1. Configure logging for firewall rule

We have not detected any red team intrusion since we began logging. This is most likely due to a firewall misconfiguration. We are actively working to remediate it.

We were unable to upload a log snippet due to issues with our logging system. We have attached a screenshot of some of the logs as follows.
